Executive Summary

Ojaswi Bhardwaj is a junior mid level engineer with a strong foundation in full stack development, distributed systems, and AI/LLM integration. His portfolio showcases end-to-end solutions that combine modern Javascript frameworks (React, Next.js) with Python backends (FastAPI, Django) and cloud infrastructure (AWS, GCP). The following report aligns his skill set with current high-growth job opportunities, highlighting the best matches and the rationale for each.

Role Matching Matrix

```

\begin{tabular}{@{}lccp{6cm}@{}}

```

```

\toprule

```

```

\textbf{Role} & \textbf{Match Score} & \textbf{Key Requirement} & \textbf{Justification} \\

```

```

\midrule

```

AI Full Stack Engineer (Early Stage Startup) & 10/10 & Next.js, FastAPI, TypeScript, LLM APIs &

```

\begin{itemize}

```

- Built MandateGuard with FastAPI, Next.js, TypeScript and an LLM pipeline (Claude/Groq) for rule generation.

- Demonstrated end-to-end AI agent workflow, matching the core of the role.

```

\end{itemize} \\

```

Backend Engineer Distributed Systems (Growth Stage) & 9/10 & Python, gRPC, Redis, PostgreSQL, Docker &

- Implemented gRPC healthcheck service in DriftSeek, decoupled from Next.js and deployed on AWS EC2.

- Used Celery + Redis for asynchronous incident classification in Dispatch.

- Dockerized all services, aligning with container-centric infra.

```

\end{itemize} \\

```

Product Engineer (AI focus) & 10/10 & React/Next.js, Node.js, vector databases/Supabase &

\item Delivered real-time chat with Flutter + GraphQL + Supabase; shows ability to ship full-stack products.

\item Built monitoring dashboard (DriftSeek) using React/Next.js with real-time updates via Socket.IO.

\item Experience with Supabase (PostgreSQL) and Hive for local storage.

\end{itemize} \\

Software Engineer I (Cloud/DevOps) & 8/10 & AWS (Lambda, S3), Docker, CI/CD, GitHub Actions & \begin{itemize}

\item Managed CI/CD pipelines in GitHub Actions for all projects.

\item Deployed FastAPI and Django services on AWS Lambda/EC2 with RDS.

\item Holds Oracle Cloud Infrastructure certifications, indicating cloud fluency.

\end{itemize} \\

Full-stack Developer (FinTech/Payments) & 9/10 & TypeScript, PostgreSQL, security protocols, API design & \begin{itemize}

\item Developed MandateGuard: Ed25519 signature verification, spending limits, and Razorpay integration.

\item Designed secure, RESTful APIs with OAuth 2.0 and gRPC, aligning with fintech security needs.

\item PostgreSQL schema design for transaction records.

\end{itemize} \\

\end{tabular}

CANDIDATE REPORT

\section*{Recommendation}

Ojaswi should prioritize AI-driven startups and growth-stage companies that require full-stack, distributed, and AI-centric engineering. Avoid generic junior roles; target positions that value his proven ability to architect and deploy complex, secure, and scalable systems.

\section*{Next Steps}

\begin{enumerate}

\item Tailor resume bullets to emphasize the highlighted projects and technologies.

\item Prepare case studies or portfolio demos for the top 3 roles.

\item Engage with recruiter networks focused on AI and fintech sectors.

\end{enumerate}

\end{document}
